

## Udder wipes with nourishment effect

### Disposable (wet) wipes impregnated with calendula-extract for skin-friendly udder cleansing

**previclean®** udder wipes offer a simple solution for skin-friendly and nourishing udder hygiene, while stimulating your cows teats right before the milking process.

Get rid of germ-ridden dirt and grime before they cause issues in your milking-harness.

**previclean®** ready to use wet wipes reduce bacteria right at the teat and are the perfect supplement for your daily sanitary milking routine.

Nourishing agents are key to prevent cracked skin, which is a breeding ground for unwanted bacteria, the resulting smooth and well cared for teats will ease your workload.

**previclean®**'s nourishing solution is based on calendula extract, an all-natural regenerative skin care supplement that has been known for centuries, supplemented by glycerin, allantoin and aloe vera.

### Content

bucket 800 pieces  
refill pack 3 x 800 pieces

### Usage

#### Before you start:

Open the packaging of the refill pack and place the sheets into the **previclean®** bucket. Pull the first sheet through the cross-cut in the lid and you're good to go!

For convenient use of your **previclean®** set up, refer below for a handy bucket holder ready made for your **previclean®** bucket.

#### In the milking parlour:

**After** you finished the pre-milking process, simply wipe the cow's teats with one **previclean®** wet wipe a piece. Once you finish setting up the milking harness the teat should already have dried off. The solution is very skin-friendly and prevents dry teat skin.

### Storage

Store horizontally, openable side facing upward

### At a glance

- sturdy crepe cloth, biodegradable
- nourishing cleaning agent
- teat dries off quickly
- skin-friendly
- convenient bucket with lid
- Hygienic: refill packs are packed individually
- easily disposable with your slurry

### Bucketholder

Convenient bucketholder made of stainless steel for easy installation in your milking parlour. The **previclean®** bucket can be placed with the opening facing upward or downward, your choice.

In case of highly contaminated udders/teats we recommend pre cleaning via uddershower.

## The teatop, a germ hotbed

There is no such thing as a germ free teat. The teat is a hotspot for everything from commonly found environmental pathogens to barn bacteria regular dry wiping can't reduce. **previclean®** wet wipes are impregnated with a nourishing and skin-friendly solution. Dirt and germs are eliminated with a simple wipe.

## Easy storage

**Bucket with lid:** Your specialized udder wet-wipes will stay fresh and moist for long term storage.

## Teat disinfection

**Ease of use:** Use **previclean®** wet wipes to sanitize the teats.

## Successfully fight germs and dirt

**Combat germ infestation:** Bacteria hide in all kinds of dirt! **previclean®** offers thorough cleaning of the udder and a drastic reduction in germ population.

## Improve your lactation

**Udder stimulation:** Quick drying of the teats, lactation will be influenced positively.

## Clean milking hands

**Cleansing side effect:** When using **previclean®** wet wipes, your hands and gloves will be cleaned as well.

## Easy disposal

**See for yourself:** Though your teats may look clean, one use of **previclean®** udder wipes will immediately soak up dirt and grime and show the difference. After use, you can simply dispose the wet wipes with your slurry.
