

Clean Silent[®]

agricultural stretch film in a class of its own

- guaranteed real running length and real 25 μ thickness
- optimum adhesion without adhesive
- excellent for wrapping round and square bales on all common wrapping machines
- certified 100 % food safe and environmentally friendly: completely made of polyethylene without harmful foreign substances, produced in Germany, 100 % recyclable
- highest yield – can be pre-stretched up to more than 90 %
- 15 months UV-stable (Northern and Central Europe)

Clean Silent®

agricultural stretch film in a class of its own

7-layer technology

Everything runs round or square with the **Clean Silent®**. **DUO Plast AG** is the only manufacturer that uses the latest 7-layer blowing technology completely **adhesive-free** agricultural stretch film produced in Germany in certified food quality. **Clean Silent®** is made from high-quality raw materials and is regularly checked in our own laboratory. This guarantees a constant **top quality**.

Quality and benefits

- 7 layer technology
- low-noise rolling behaviour – can also be used in residential areas without any problems
- very high puncture resistance
- best adhesion – perfectly sealed film layers and tight bales
- no adhesive deposits on the rollers on the wrapping machine
- best colouring and opacity of the film
- easy handling of the bales due to very smooth outer surface
- excellent for wrapping round and square bales on all common wrapping machines
- core sealed to be moisture resistant

The versions

- colours: white and moss green
